<p>SIDeseam ADHESIVES</p> <p>Sideseam adhesive is used to secure the cigarette paper around the tobacco rod. Sideseam adhesives are used in small amounts.</p>	ETHYLENE/VINYL ACETATE, COPOLYMER EMULSION IN WATER	0.3
	POLYVINYL ACETATE	0.3
	VINYL ALCOHOL-VINYL ACETATE COPOLYMER	0.3
	PROCESSING AIDS (DEFOAMER, PRESERVATIVE, WATER)	
<p>MONOGRAM INKS</p> <p>Cigarette papers often have a small brand identifying mark (monogram) printed either on the cigarette paper towards the filter end of the cigarette or on the tipping paper. The monogram is printed on the paper using a minute amount of ink. The monogram inks used on our cigarettes may contain, for example,</p>	IRON OXIDE BLACK	0.005

FILTRATION MATERIALS Cigarette filters are attached to the end of the cigarette rod. Filters are made in a variety of designs. In addition to papers and adhesives (both of which are discussed separately), most cigarette filters contain filtration materials known as a filter tow and a plasticizer. The filter tow is the bundle of cellulose acetate fibers or papers that comprise the bulk of a cigarette filter. A plasticizer is a softening agent that is added to the filter tow in small quantities to bind the filter fibers together. Some of our brands also contain carbon designed to assist in the filtration process.	CELLULOSE ACETATE	36.4

	SODIUM CHLORIDE	0.005
	PROCESSING AIDS (FINISHING OIL)	
FILTER PAPERS (including PLUG WRAPS, TIPPING PAPERS and TIPPING PAPER INKS) A cigarette filter contains two papers. First, a plug wrap is used to contain the filtration materials (i.e., filter tow and plasticizer). Second, a tipping paper holds the filter to the cigarette rod. The tipping paper is wrapped around the filter assembly (i.e., filtration materials and plug wrap) and extends over the cigarette rod. Tipping paper is made from cellulose fiber and may have applied to it	CELLULOSE	3.3
